# OAS – Fact Sheet

---

- First term 2008 - 2010
- Project partners:
  - Göttingen State- and University Library
  - Computer and Media Service, Humboldt-Universität zu Berlin
  - Saarland University and State Library
  - University Library of Stuttgart
- <http://www.dini.de/projekte/oa-statistik/english/>

# Challenges

---

- Log files as a result of the **usage** of repositories
- Gathering and aggregation of usage events through a central service provider
- Value-added services provided by the central service provider
- Usage data then to be retransferred to the repositories

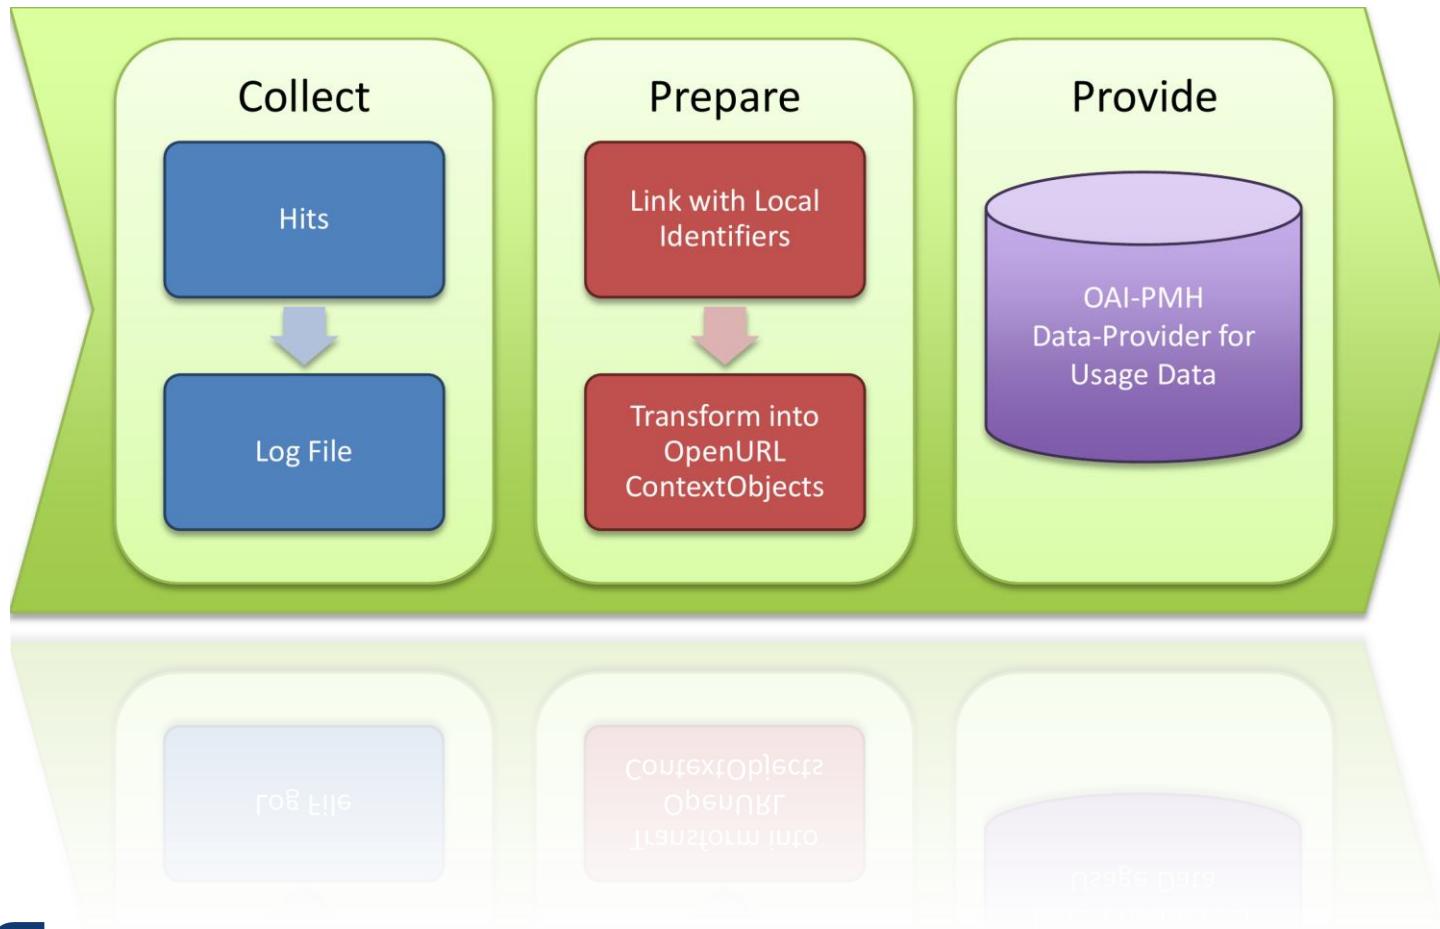

# Aims

---

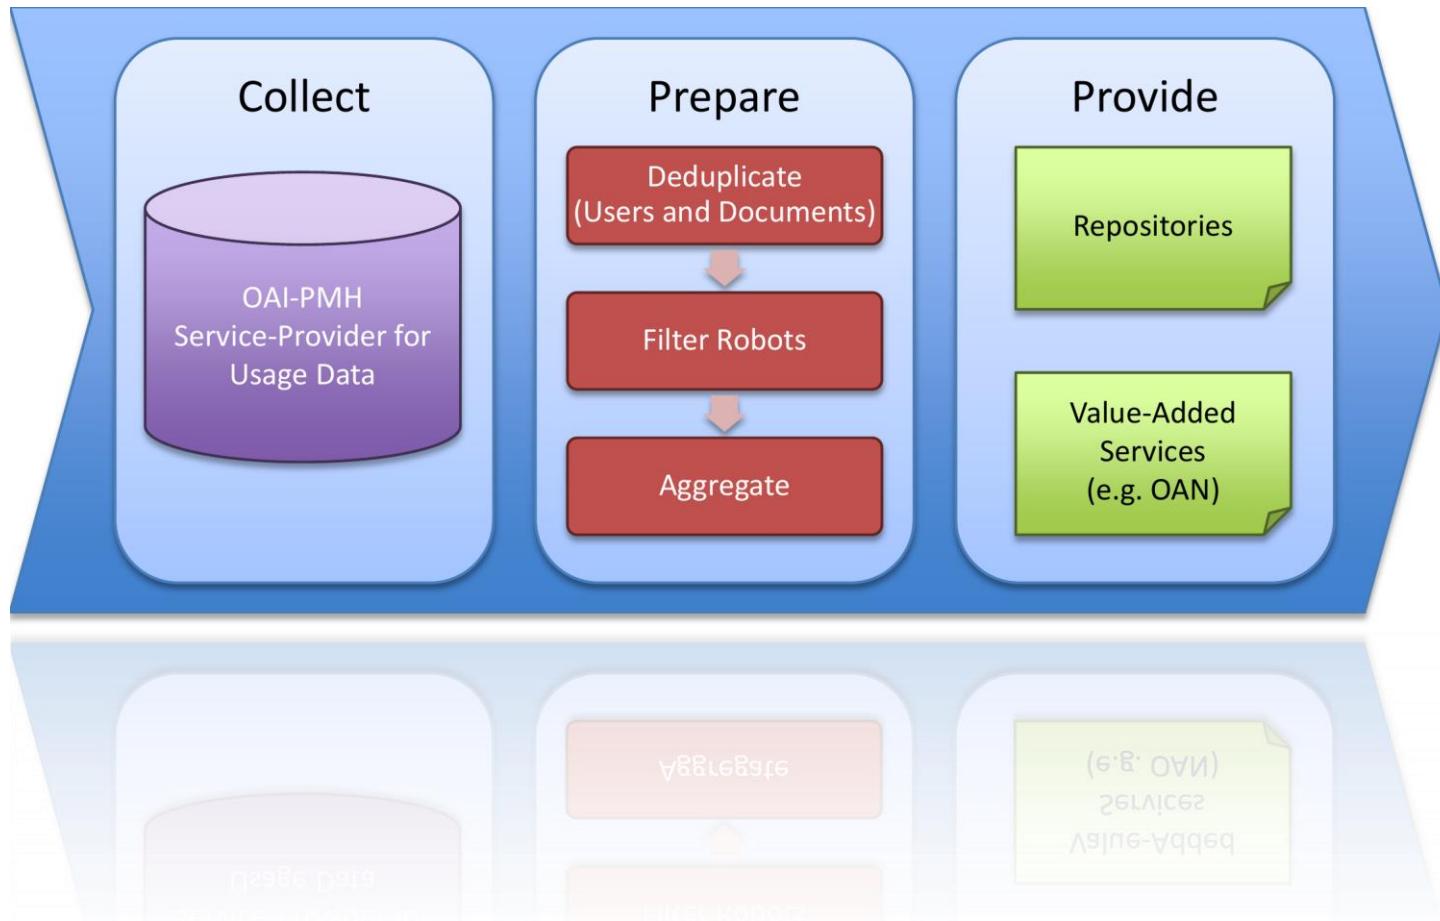

- A common standard to enable the exchange of usage data between different services (e.g. repositories)
- An infrastructure to collect, process and exchange this usage data
- Usage data has to be provided by the repositories according to standards (COUNTER, LogEc and IFABC)
- Value-added services for repositories
- Implementation guidelines

# Technical Infrastructure

# Data provider

# Service provider

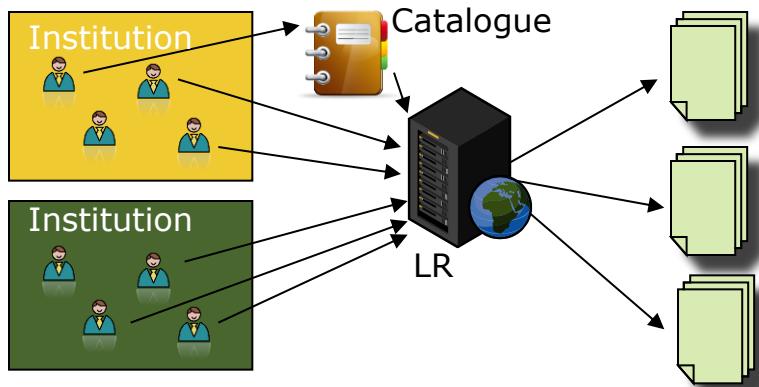

# Results and Outlook

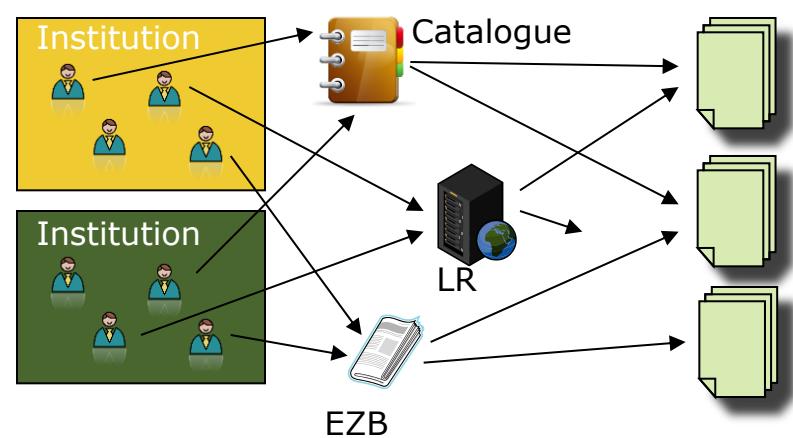

# Lessons Learned I

- Need for a central clearing house
- An amount of unnecessary data (OpenURL CO)  
→ increase of the data size by factor ~10
- Different situation with Linkresolvers

**USA**

**Germany**

# Lessons Learned II

---

- ❑ Not every standard (COUNTER, LogEc and IFABC) fulfils the requirements  
→ focus on COUNTER and IFABC
- ❑ Potential legal problems with German laws on privacy issues

# Results

---

- Infrastructure for exchange of usage statistics
- Modules for OPUS- and DSpace-based repositories, other products can be configured easily, <http://www.dini.de/projekte/oa-statistik/english/software/>
- Specification of the data format and exchange  
[http://www.dini.de/fileadmin/oa-statistik/projektergebnisse/Specification\\_V5.pdf](http://www.dini.de/fileadmin/oa-statistik/projektergebnisse/Specification_V5.pdf)
- Online demo  
<http://oa-statistik.sub.uni-goettingen.de/statsdemo>
- Website with further information  
<http://www.dini.de/projekte/oa-statistik/english/>

**Hoffmann, Daniele; Bauer, Daniel; von R Schleyer, Paul; Pieper, Ursula; Stalke, Dietmar (1993): Cation-induced structural alterations in the organo alkali metal**

**Nutzungsstatistik Abstract**

The chart displays the number of views (Aufrufe) for the document over a period of 161 days. The x-axis shows dates from 01.09.2009 to 01.01.2010. The y-axis shows the number of views from 0 to 40. A significant peak is visible around November 26, 2009, with 14 views recorded on that day.

Summe letzte 161 Tage: 470

Zeitraum: 30 Tage 90 Tage Alles (161 Tage)

Weitere Informationen

triphenylmethane: a combined x-ray and NMR study of the potassium-cesium salts - Organometallics, Vol. 12, 4, 1193-1200

Serie/Report Nr.: Organometallics; Vol. 12, 4, 1193-1200

Zusammenfassung: The set of alkali metal solid-state structures of Ph<sub>3</sub>CM-nL [M = K, Rb, Cs; L = (ligands) PMDTA (N,N',N'',N''-pentamethyldiethylenetriamine), THF (tetrahydrofuran)] provides instructive comparisons. Ph<sub>3</sub>CK-THF-PMDTA (1) crystallizes as a monomeric contact ion pair: the K<sup>+</sup> cation is symmetrically \$-coordinated to one of the phenyl rings, but not to the deprotonated central carbon. Both [Ph&Rb-PMDTA]. (2) and P<sub>n</sub>~CCWPMDTA(3.) form one-dimensional polymers and eschew THF. The Rb cations in 2 bridge the triphenylmethyl moieties by +x%"xmton to separate phenyl rings. This gives rise to a zigzag chain. In 3, each Cs cation also bridges two carbanions, but in a somewhat different fashion. While Cs+ is located rather symmetrically (119 above the phenyl ring of one trityl moiety, a "propeller"-like coordination to a second trityl anion

# Open Access Statistics 2 (OAS 2)

HUMBOLDT-UNIVERSITÄT ZU BERLIN

Initiated by:

GBV | VZG

Funded by:

DFG

# OAS 2 – Aims

---

Start in April 2011 – for 2 years:

- Clarification of legal questions (laws on privacy protection)
- Opening the OAS infrastructure to offer standardised usage statistics
- Evaluation of metrics
  - a) based on the pure frequency of usage
  - b) more sophisticated approaches
- Cooperation to facilitate international comparable usage statistics
- Offer a functional service infrastructure
  - Sustainability report after the first year

# International cooperation

---

- PIRUS Publisher and Institutional Repository Statistics, UK
- SURFSure Statistics on Usage of Repositories, NL
- Knowledge Exchange Usage Statistics Group
  - Denmark's Electronic Research Library (DEFF)
  - German Research Foundation (DFG)
  - Joint Information Systems Committee (JISC)
  - SURFfoundation, Netherlands
- Common sense
  - Exchange format: OpenUrl ContextObjects
  - Transfer via OAI-PMH
  - Infrastructure based on a data provider – service provider system
  - Normalisation: Robots-Detection
- COUNTER, NEEO, PEER, OAPEN ...

# Thanks for your attention!
